29.8% of women aged 18 to 25 studied at post-secondary institutions in the winter semester 2019/20

Vienna, 2020-09-02 – In the winter semester 2019/20, 376,050 students attended Austrian public universities, universities of applied sciences, university colleges of teacher education and private universities, according to Statistics Austria. Compared to the previous year, this corresponds to a slight decrease of 0.2%. Considering the significantly stronger decline in the 18-to-25-year-old population by 2.3% from 2019 to 2020, however, the development in the number of students of post-secondary institutions is an expression of a continuously rising student quota. Overall, the student quota in this age group was 24.7%, among women even 29.8%.
