

Statistical grids Data and Fees

Population Stock
Buildings and Dwellings Register
Register-Based Labour Market Statistics

Census 2011 (and 2001)
Population census
Buildings and Dwellings Census
Census of Enterprises and their Local Units of Employment

Fees for internal, non-commercial use

(as of January 2022)

Data Packages

Data is offered in package, but also single characteristics can be ordered. The region of the requested data can be chosen without restrictions, for the delineation a 1km grid size is used. The fees are published for the whole national territory of Austria. More details on the available characteristics can be found in the metadata catalogue *reg.data* under <http://www.statistik.at/reg-datenkatalog/>.

Packages derived from Registers

Package A – Register-Objects

State of data: yearly updates with date as of 1 January

Description: Objects from the packages Population Stock and Buildings and Dwellings Register

Objects:

- Resident population (number of persons with main residence)
- Number of persons with secondary residence
- Number of buildings
- Number of residential buildings
- Number of dwellings

Package Population Stock

State of data: yearly updates with date as of 1 January (available in July)

Description: Objects and Characteristics from the Population Stock (statistical population register)

Objects:

- Resident population (number of persons with main residence)

Characteristics:

- Resident population by age groups and sex (11x2)
- Resident population by country of birth (18)
- Resident population by citizenship (18)
- Resident population by country of origin (18)

Package Buildings and Dwellings Register

State of data: yearly updates with date as of 1 January

Description: Objects and Characteristics from the Buildings and Dwellings Register

Objects:

- Number of buildings
- Number of dwellings
- Number of residential buildings
- Number of usage units
- Number of buildings with dwellings

Characteristics:

- Buildings by building use (12)
- Buildings by residential use and number of dwellings (16)
- Buildings by construction period (12)
- Buildings by type of residence (4)
- Buildings by gross area (9)
- Residential buildings with 1 dwelling by floor space (6)
- Residential buildings with 2 dwellings by floor space (6)
- Residential buildings with 3 or more dwellings by floor space (6)
- Dwellings by number of rooms (7)
- Dwellings by floor space (9)

Packages derived from the Register-based Labour Market Statistics (RbLMS)

Package RbLMS-Objects

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects from the packages of the Register-based Labour Market Statistics

Objects:

- Resident population (number of persons with main residence)
- Number of households
- Number of families
- Number of daytime population
- Number of Commuters at place of work place or educational institution
- Number of Commuters at place of residence

Package RbLMS-Demography and Employment

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Demography and Employment

Objects:

- Resident population (number of persons with main residence)

Characteristics:

- Resident population by age groups and sex (42)
- Resident population by citizenship (14)
- Resident population by country of birth (14)
- Resident Population by legal marital status (4)
- Resident population by current activity status and sex (12)
- Resident population by status in employment and sex (12)
- Resident population by economic activity (OENACE 2008) of the local unit and sex (46)

Package RbLMS-Education

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Education

Objects:

- Resident population (number of persons with main residence)

Characteristics:

- Resident population by educational attainment - highest completed level (9)
- Resident population by field of education (attainment) (11)
- Resident population by participation in formal education (15)
- Resident population 15 years and over

Package RbLMS-Households

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Households

Objects:

- Number of households

Characteristics:

- Households by type of household (7)
- Private households by size (4)
- Number of private households with persons under 15 years
- Number of private households with persons under 18 years
- Number of private households with persons 65 years and older

- Household reference person of private households by age and sex (12)
- Household reference person of private households by legal marital status (4)
- Household reference person of private households by country of birth (6)
- Household reference person of private households by citizenship (6)
- Household reference person of private households by current activity status (6)
- Household reference person of private households by status in employment (4)
- Household reference person of private households by highest completed level of education (4)

Package RbLMS-Families

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Families

Objects:

- Number of families

Characteristics:

- Families by type of family nucleus (6)
- Families by size of family nucleus (3)
- Number of families with children under 6 years
- Number of families with children under 15 years
- Number of families with children under 18 years
- Number of families with children under 25 years

Package RbLMS-Commuters

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: Objects and Characteristics from the Register-based Labour Market Statistics - Commuters

Objects:

- Number of commuters at place of residence
- Number of commuters at place of work or educational institution
- Number of economically active commuters at place of residence,
- Number of economically active commuters at place of work
- Number of commuting pupils/students at place of residence
- Number of commuting pupils/students at place of educational institution

Characteristics:

- Economically active commuters at place of residence by distance (km) (10)
- Economically active commuters at place of residence by minutes (10)
- Economically active commuters at place of work by distance (km) (9)
- Economically active commuters at place of work by minutes (9)
- Commuting pupils/students at place of residence by participation in formal education (12)
- Commuting pupils/students at place of residence by distance (km) (10)
- Commuting pupils/students at place of residence by minutes (10)
- Commuting pupils/students at place of educational institution by participation in formal education (12)
- Commuting pupils/students at place of educational institution by distance (km) (9)
- Commuting pupils/students at place of educational institution by minutes (9)

RbLMS-Grid based Commuting Matrix

State of data: yearly updates with date as of 31 October (available appr. 21 months later).

Description: "From"- "To" Commuting relations from the Register-based Labour Market Statistics

The commuting matrix contains the "from" (place of residence) and "where" (place of work / school) on the basis of grids for the economically active commuters and commuting pupils/students respectively. It is offered for grid sizes 250m, 500m and 1km.

The commuting matrix on the basis of grids can also be obtained for a specific region only (project area). In order to keep all commuting relations for commuters from or into the project area within Austria, the matrix for this excerpt is created individually for the customers. Within the project area, it contains the commuting matrix on

the basis of grids, and for commuters who commute into the project area or commute out of the project area it contains the relationship municipality to grid and grid to municipality respectively. The price for the matrix for a project area is determined individually (no update price).

Packages from the Census 2011

Package Census 2011 Objects

State of data: 31.10.2011

Description: Objects from the packages of the Census 2011

Objects:

- Resident population (number of persons with main residence)
- Number of households
- Number of families
- Number of daytime population
- Number of Commuters at place of work place or educational institution
- Number of Commuters at place of residence

Package Census 2011 - Workplace / Local Units of Employment

State of data: 31.10.2011

Description: Objects and Characteristics from the 2011 Census of Enterprises and their Local Units of Employment

Objects:

- Number of local units of employment (workplaces)
- Number of employees

Characteristics:

- Local unit by total number of employees (11)
- Local unit by number of self-employed persons (4)
- Local unit by number of employed persons (11)
- Local unit by NACE-Classification (Rev. 2) (21)
- Local unit by legal form of the enterprise (17)
- Employees at place of the local unit by occupational status and sex (8)
- Employees at place of the local unit by country of main residence (7)
- Self-employed persons at place of the local unit by NACE-Classification (Rev. 2) and sex (42)
- Employed persons at place of the local unit by NACE-Classification (Rev. 2) and sex (42)

Package Census2011 - Buildings and Dwellings

State of data: 31.10.2011

Description: Objects and Characteristics from the Census of Buildings and Dwellings 2011

Objects:

- Number of buildings
- Number of dwellings
- Number of residential buildings
- Number of buildings with dwellings

Characteristics:

- Buildings by type of residence (2)
- Buildings by building use (10)
- Buildings by construction period (8)
- Buildings by number of dwellings in the building (7)
- Buildings by net building area in square meters (5)
- Buildings by number of floors above ground (7)
- Buildings by type of ownership (4)

- Dwellings by type of residence (2)
- Dwellings by number of persons with main residence (6)
- Dwellings by number of rooms (4)
- Dwellings by net floor space in square meters (5)

Package Census2011 - Demography and Employment

State of data: 31.10.2011

Description: Objects and Characteristics from the Population Census 2011 - Demography and Employment

Objects:

- Resident population (number of persons with main residence)

Characteristics:

- Resident population by age groups and sex (42)
- Resident population by citizenship (14)
- Resident population by country of birth (14)
- Resident Population by legal marital status (4)
- Resident population by current activity status and sex (12)
- Resident population by status in employment and sex (12)
- Resident population by economic activity (OENACE 2008) of the local unit of employment and sex (46)

Package Census2011 - Education

State of data: 31.10.2011

Description: Objects and Characteristics from the Population Census 2011 - Education

Objects:

- Resident population (number of persons with main residence)

Characteristics:

- Resident population by educational attainment - highest completed level (9)
- Resident population by field of education (attainment) (11)
- Resident population by participation in formal education (15)
- Resident population 15 years and over

Package Census2011 - Households

State of data: 31.10.2011

Description: Objects and Characteristics from the Population Census 2011 - Households

Objects:

- Number of households

Characteristics:

- Households by type of household (8)
- Private households by size (4)
- Number of private households with persons under 15 years
- Number of private households with persons under 18 years
- Number of private households with persons 65 years and older
- Household reference person of private households by age and sex (12)
- Household reference person of private households by legal marital status (4)
- Household reference person of private households by country of birth (6)
- Household reference person of private households by citizenship (6)
- Household reference person of private households by current activity status (6)
- Household reference person of private households by status in employment (4)
- Household reference person of private households by highest completed level of education (4)

Package Census2011 - Families

State of data: 31.10.2011

Description: Objects and Characteristics from the Population Census 2011 - Families

Objects:

- Number of families

Characteristics:

- Families by type of family nucleus (6)
- Families by size of family nucleus (3)
- Number of families with children under 6 years
- Number of families with children under 15 years
- Number of families with children under 18 years
- Number of families with children under 25 years

Packages from the Census 2001

Following Packages are also available from the Census 2001 as of 15.5.2001. For more information please contact geoinformation@statistik.gv.at.

Standard package A – objects from the 2001 Censuses

Standard package B – characteristics from the 2001 Population Census

Standard package C – characteristics from the 2001 Building and Dwelling Census

Standard package D – characteristics from the 2001 Census of Enterprises and their Local Units of Employment

Standard packages E – dwelling characteristics (heating and fuel) from the 2001 Building and Dwelling Census

Fees for internal, non-commercial use in €

A fixed basic amount of €291 will be charged per order to cover consultancy, processing and billing costs. Selected data (packages) in grid size 10km are available for free.

Fees for one Object/Characteristics	100m	250m	500m	1.000m	2.000m	5km

Confidentiality / Data Protection

The absolute counts (objects) of the respective units are provided to the customer without suppression, even for the smallest grid sizes. However, if the grid cells are not sufficiently populated the characteristics for the units are suppressed. The data protection threshold depends on the type of the unit.

Data with creation date **before 31 October 2011:**

- **Objects:** without restrictions
- **Population data:** characteristics relating to the resident population or households are released only if at least 31 persons with main residence (resident population) are registered in the grid cell.
- **Buildings and Dwellings data:** characteristics relating to buildings or dwellings are released only if at least four buildings resp. four dwellings are registered in one grid cell.

Data with creation date **starting at 31 October 2011:**

- **Objects:** without restrictions (number of persons with main residence, number of persons with secondary residence, number of daytime population, number of buildings, number of residential buildings, number of dwellings, number of usage units, number of buildings with dwellings, number of local units of employment (workplaces), number of employees, number of commuters at place of work place or educational institution, number of commuters at place of residence, number of households)
- **Population data:** characteristics relating to the resident population (demography, employment and education) are released only if at least 4 persons with main residence are registered in the grid cell.
- **Household data:** characteristics relating to the households or household representatives are released only if at least 4 households are registered in the grid cell.
- **Family data:** characteristics relating to families are released only if at least 4 families are registered in the grid cell.
- **Buildings:** characteristics relating to buildings are released only if at least three buildings or three dwellings are registered in one grid cell.
- **Dwellings:** characteristics relating to dwellings are released only if at least three dwellings are registered in one grid cell.
- **Commuters at place of residence:** characteristics relating to commuters are released only if at least 4 commuters at place of residence are registered in the grid cell.
- **Commuters at place of work place or educational institution:** characteristics relating to commuters are released only if at least 4 in-commuters are registered in the grid cell.
- **Local Units of Employment (workplaces):** characteristics relating to LUE are released only if at least 3 local units of employment are registered in the grid cell.
- **Employees:** characteristics relating to employees are released only if at least 4 employees are registered in the grid cell.

Terms of use

For the use of data on the basis of regional statistical grid units, Statistics Austria differentiates between internal use, commercial use excluding resale and commercial use including resale. When acquiring the data, the customer must sign the relevant terms of use. The data may only be used within the scope of the agreed use.

Further Information

The geodata of the statistical grids (excluding attribute data) are available for free on the internet http://data.statistik.gv.at/web/meta.jsp?dataset=OGDEXT_RASTER_1
